

HCA Florida West Hospital

Pharmacy Department

Pharmacy Mission Statement

The department of pharmacy at HCA Florida West Hospital is dedicated to the provision of excellence in patient care, education, community service and research.

Overview

The pharmacy department serves patients from the inpatient pharmacy as well as decentralized locations throughout the hospital. This includes the intensive care unit, cardiovascular care unit, progressive care unit, adult medical/surgical floors, emergency department, pediatric medical unit, pediatric intensive care unit, and three free standing emergency departments. The integrative care and decentralized pharmacy practice model provides increased opportunities for collaboration with physicians, graduate medical education (GME) medical residents, mid-level practitioners, nurses and patients, in order to optimize patient-centered care.

Clinical Pharmacy Services

Our department of pharmacy offers patients a range of clinical pharmacy services, including:

- Admission and discharge medication reconciliations with patient education
- Consultation services including anticoagulation dosing and monitoring, parenteral nutrition management, glycemic control management, pharmacokinetic management of vancomycin and aminoglycosides, and pain management including patient-controlled analgesia
- Daily antimicrobial review for de-escalation and appropriateness
- Daily direct patient care rounding with an interdisciplinary team
- Drug information in-services to all members of the healthcare team
- Renal dosing of more than 100 medications, intravenous to oral medication conversion of more than 30 drugs, and dose rounding for several weight-based medications
- Utilization of a pharmacy surveillance system that alerts pharmacists to medication management opportunities
